

Uniform distribution over regimes, $L = 512$, 200 samples

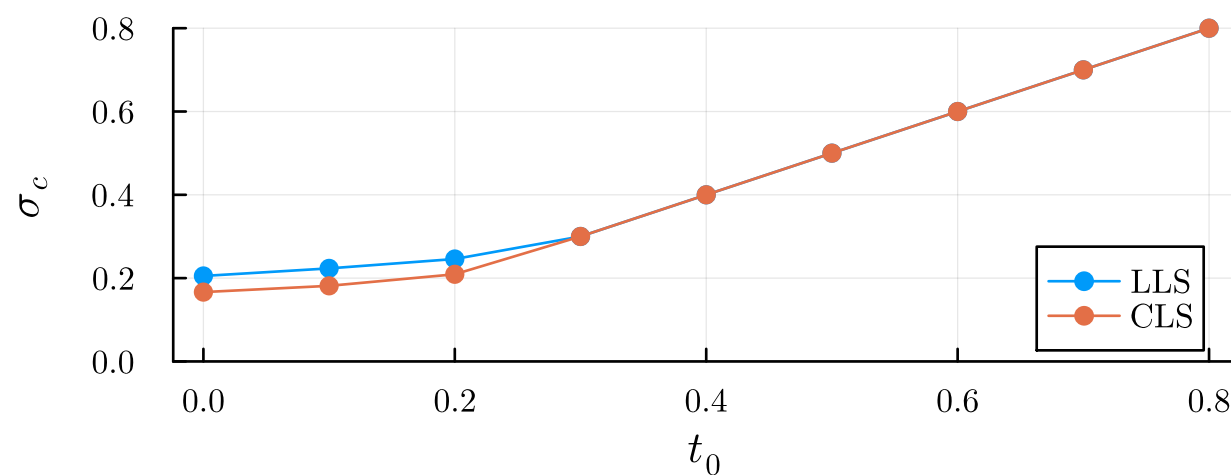

A: Maximum of number of clusters

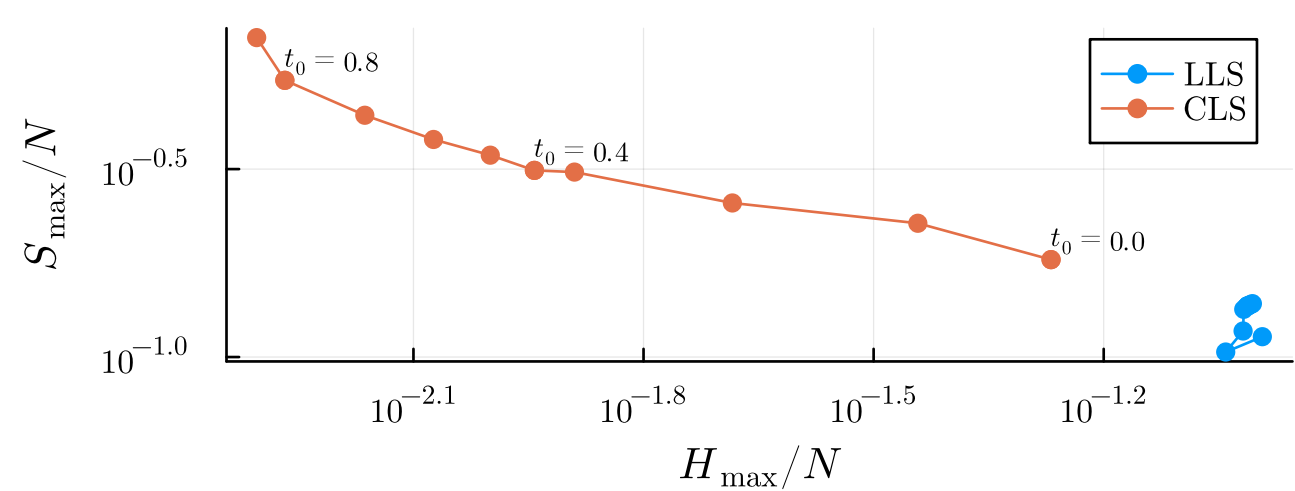

B: k/N where maximum was reached

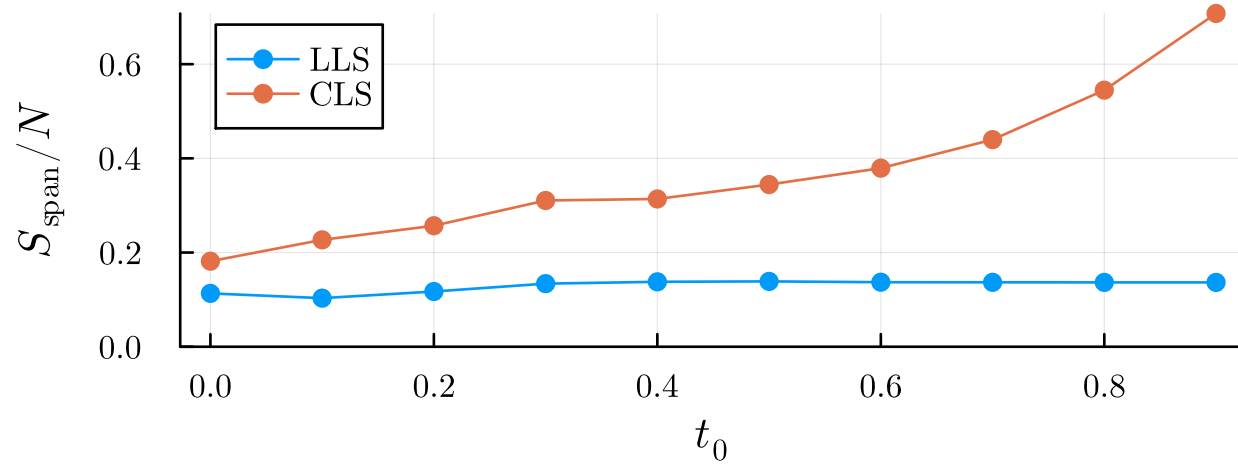

C: Maximum of σ_c

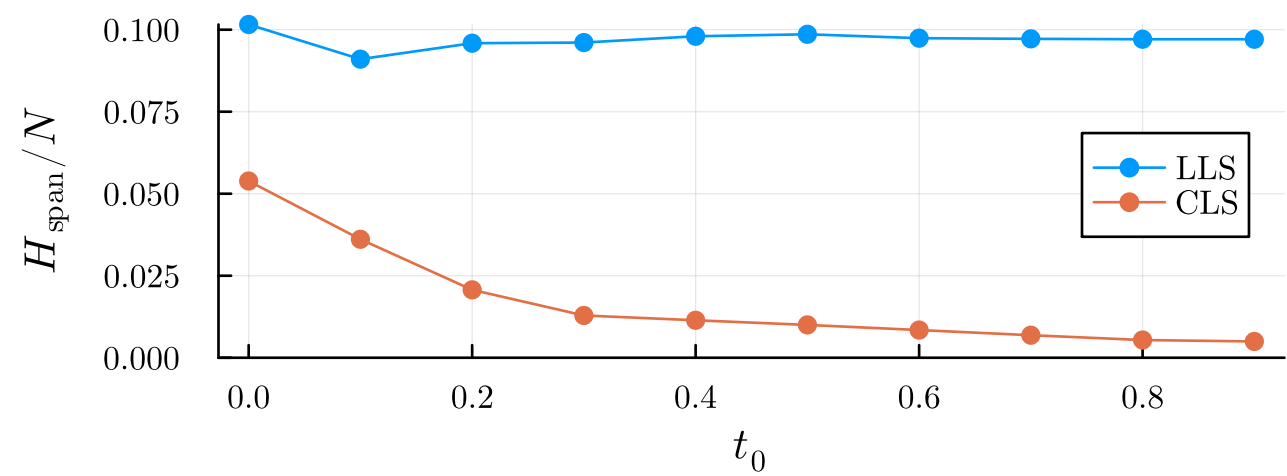

A: Spanning cluster over perimeter

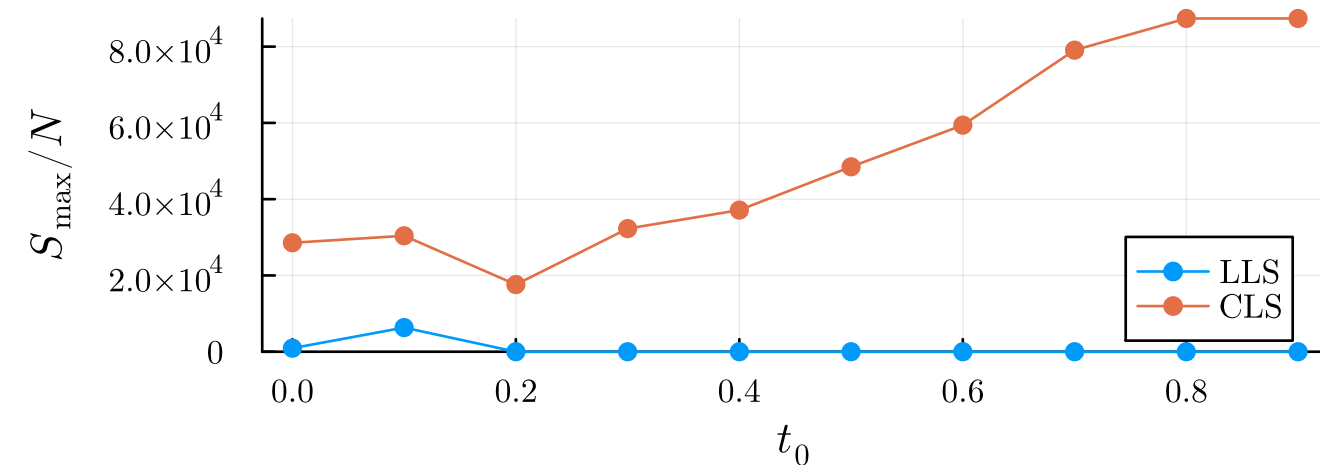

B: Spanning cluster size

C: Spanning perimeter size

D: Largest cluster size at $k/N = 1/3$

D: Largest perimeter size at $k/N = 1/3$
